Visit milagromobilemarketing.com website to learn more useful information about Android apps. See also: Pia Apk Fire Stick tried searching in google app but it doesn't show there as well. In the application manager, its display is enabled. 03-29-2019 14:18 Like 0 welcome to the forum. What phone do you have? Do you have any folder in the app drawer named after your brand or carrier? 03-29-2019 14:24 As 0 SIM Toolkit will show, SIM Toolkit apk is just the installation file that installed the SIM TOOLKIT, you will not see it (the installer will remove it after installing the application). If you want apk, use Apk Extractor to create it. (It would be to install it on another phone, or reinstall it if you accidentally deleted it, or if it is updated and you don't like the update.) 03-29-2019 16:51 How 0 Controlling your phone's SIM card is pretty little on the priority list of most smartphone users. When you buy a smartphone, you put on a chip and maybe you don't give it a second thought until you need to upgrade it or remove it to check. You may not know if your SIM card stores a large amount of data. When you have the SIM Toolkit for Android installed, easily access and manipulate all of this data. Sometimes, however, in a SIM toolkit that is a sim toolkit, you may experience a common error that is suddenly disabled in the SIM toolkit. Don't worry about it. In this article, you will learn how to enable sim toolkit for Android.What data are on the SIM card? Simsim card is short for The identity module card contains an unusually high amount of data about the phone:International Mobile Subscriber Identity (IMSI): A 15-digit number identifying the User on the operator's network. Authentication key: SIM cards contain a 128-bit authentication key to verify your network connection. Contacts and SMS: SIM cards can hold up to 500 contacts and messages. If you place your SIM card on other devices, your contacts will be automatically transferred. PIN and PUK: You can use a PIN to restrict access to your SIM card (this is separate from your phone's PIN). The PUK code is used to unlock the PIN code. Temporary information: The SIM card also stores a large number of temporary phone data, which consists of location area identity (LAI), a list of services you have permission to access, and SMSC IDs. About sim toolkit on AndroidSIM Application Toolkit (commonly referred to as STK) is a standard GSM system that allows the Subscriber Identity Module (SIM) to initiate activities that can be used for many value-added services. The SIM Toolkit includes a set of commands programmed on the SIM card that identify how the SIM card should interact directly with the outside world and start commands independently of the handset and network. This allows the SIM card to configure and manage interactive exchanges between the network application and the end user. The SIM card also grants commands to the handset, such as displaying menus and/or asking for user input. SIM Toolkit on AndroidSIM Toolkit main features: – Identify sim card information and manage SIM contacts- Input and output phone number on SD card.– Delete or add new phone numbers.– Send a message or make a call from this app.– Copy create a backup of the SIM phone number on the Sdcard.How to enable the SIM toolkit on AndroidWhen you can't access the SIM toolkit or SIM Toolkit is suddenly inactive, it's better to apply these solutions below, to deal with this problem so quickly, as much as possible.
